

Aero Moto 1100 Wiring Diagram

Version 12.15.2021

* all lights turn automatically on with ignition switch to meet safety regulations, but can be toggled off with push button that also operates flasher and high beam

NOTES
 Left side Motogadget and aftermarket switch components except for neutral & oil pressure switches. Right side OEM Guzzi components. Two replacement relays (fuel pump, injector/ECU) and two inline fuses (1A and 40A master fuse).
 Motogadget air temp, sump oil temp, sump oil pressure duplicate sensors; speed sensor replaces speedometer cable.
